Contents

1 Notation; Sets and Functions **1**

1.1 Sets . . . 1

1.2 Functions . . . 4

1.3 Partitions and Equivalence Relations . . . 11

1.4 Exercises . . . 13

2 Introductory Examples **15**

2.1 Exercises . . . 20

3 Vector Spaces **23**

3.1 Fields . . . 23

3.2 Vector Spaces . . . 25

3.3 Exercises . . . 29

4 Geometric Interpretation **31**

4.1 Exercises . . . 34

5 Linear Transformations and Isomorphism **35**

5.1 Linear Transformations . . . 35

5.2 Isomorphism . . . 37

5.3 Exercise . . . 38

6 Deriving Vector Spaces from Given Ones **39**

6.1 Vector Subspaces . . . 39

6.2 Direct Sums . . . 43

6.2.1 Internal Direct Sum . . . 43

6.3 Quotient Spaces . . . 44

6.4 $\mathrm{Hom}_{\mathbb{F}}(V, W)$ and the Dual of a Vector Space . . . 45

6.5 Exercises . . . 47

7 Linear Dependence **49**

7.1 Exercises . . . 53

8 Classification of Finitely Generated Vector Spaces **55**
8.1 The Universal Property of a Basis 60
8.2 Exercises 62

9 Matrix Representation of a Linear Transformation **63**
9.1 The Matrix of a Composite Linear Transformation 68
9.2 The Matrix of the Sum of Linear Transformations 71
9.3 Algebraic Properties of the Operations on Matrices 72
9.4 Matrices Representing the Same Linear Transformation 72
9.5 Another Look at Matrix Multiplication 76
9.6 Exercises 76

10 Rank and Nullity **79**
10.1 Rank and Nullity for Matrices 81
10.2 Calculating the Column Space and the Null Space of a Matrix 84
10.2.1 Elementary Row Operations 84
10.3 Exercises 88

11 The Determinant and the Trace **89**
11.1 The Determinant 89
11.1.1 The Main Theorem on Determinants 91
11.2 Applications of the Determinant 94
11.2.1 When Do $\mathbf{v}_1, \ldots, \mathbf{v}_n \in V$ Comprise a Basis? 94
11.2.2 Fitting Curves to Given Points 95
11.3 The Trace 97
11.4 The Transpose of a Matrix 98
11.5 Exercises 99

12 Eigenvalues and Eigenvectors **101**
12.1 The Cayley-Hamilton Theorem 110
12.2 Discussion 114
12.3 Exercises 116

13 Inner Product Spaces **119**
13.1 Normed Vector Spaces 119
13.2 Inner Products 122
13.3 Exercises 125

14 Orthogonality **127**
14.1 Orthogonal Complements 132
14.2 Orthogonal Transformations 134
14.3 Exercises 135

15 Matrix Representations of Inner Products **137**
15.1 Exercises 140

16 Adjoint Linear Transformations **141**
16.1 Riesz Representation Theorem 142
16.2 Exercises 146

17 Real Quadratic Forms **149**
17.1 Exercises 152
